SUMMARY

Data analyst with 5+ years of experience working with data, from cleanup and preparation through to dashboard development and predictive modeling. Recently focused on credit risk analytics at Phoenix, analyzing loan performance and supporting risk reduction strategies. Prior experience in marketing analytics, building performance reports and tracking campaign effectiveness.

TECHNICAL SKILLS

- **SQL:** SSMS and Netezza for performance tracking, customer segmentation, and data analysis
- **Python & Excel:** Pandas, Scikit-Learn, Excel, automation for data work and building predictive models
- **BI Tools:** Power BI, Tableau for dashboards tracking campaigns, business metrics, and KPIs
- **Statistics:** Hypothesis testing, statistical inference, risk modeling
- **A/B Testing:** Testing different approaches to improve conversion rates and performance
- **AI-Assisted Analysis:** Experience with AI tools for accelerating analysis and generating insights

PROFESSIONAL EXPERIENCE

Phoenix – Data/BI Analyst 2025 – 2026

- Analyzed loan performance trends, forecasted patterns, and provided strategic recommendations to support lending decisions.
- Designed Power BI dashboards displaying default rates, approval rates, and key credit risk metrics for stakeholders.
- Applied statistical models to predict defaults and assist with risk-based lending decisions.
- Automated daily product floor reports using Python and SQL, enabling cross-team reliance on timely, accurate data.

Pandologic – Data Analyst 2020 – 2024

- Wrote SQL queries to analyze marketing campaigns, segment customers, and measure campaign performance across channels.
- Built reports identifying the most effective marketing efforts for customer acquisition and retention.
- Created ETL pipelines using SQL to clean and prepare marketing data for downstream analysis.
- Ran A/B tests and applied statistical analysis to optimize campaign performance and conversion rates.
